News

2012-07-30

Version 1.5 released.

SOURCEFORGE.NET

Introduction

Do you want to be informed about new Poedit releases? [Monitor the project at SourceForge.net](#)

[Windows version](#)
[Mac OS X version](#)
[Linux binaries](#)
[Source code](#)

You can download Poedit [here](#).

Latest stable version is 1.5.4, see [Changelog](#) for the list of changes.

Help make Poedit better. donate towards its development!

(The more money I raise, the more extra time I will spend working on Poedit and making it better. All of the donations will be spent exclusively to fund development time.)

Windows version

The easiest way to install Windows version of Poedit is to use the installer ([poedit-1.5.4-setup.exe](#)). Windows 95/98 systems are no longer supported, use version 1.3.6 if you require support of these systems.

Mac OS X version

Mac OS X version is available as [disk image \(poedit-1.5.4.dmg\)](#). It requires Mac OS X 10.4 (Tiger) or newer.

[2] For example we are translating plugin in 'Hindi' language. You could find extension of 'Hindi' language here: http://codex.wordpress.org/WordPress_in_Your_Language

/languages/ folder and update settings in wp-config.php (define('WPLANG', 'azb_AZB');)

Afrikaans (af)

- The Afrikaans translation page at locamotion.org.
- General information for WordPress translators at locamotion.org
- Quick Start Guide for new translators at locamotion.org's Pootle server
- Translator Widget

The team consists of [Samuel Murray](#), and is active as of June 2008. Please, feel free to join me.

Please note: All attempts to contact the previous Afrikaans team have failed. The previous team used Launchpad[2][3] and had a WordPress team blog[4].

Albanian (sq_AL)

- WordPress in Albanian

Arabic – عربي (ar)

- ووردپريس العربي

Azeri - Azərbaycan

- WordPress Azerbaijan Translators team Wordpress 3.0
- Azerbaijani translation on Pottle [5]
- Azerbaijani translation from BayBak [6]. Please download the file, upload it in /wp-content/languages/ folder and update settings in wp-config.php (define('WPLANG', 'azr_AZR');)

Bangla - Bengali (bn_BD)

- Wordpress Bangla Language Pack-3.0
- Bengali localization of wordpress. Project Code: Meghdut

- 19 Esperanto (eo)
- 20 Estonian - Eesti (et)
- 21 Faroese (fo)
- 22 Finnish - Suomi (fi)
- 23 French - Français (fr_FR)
- 24 Gaelge - Irish
- 25 Galician - Galego (gl_ES)
- 26 Georgian - ქართული (ge_GE)
- 27 German - Deutsch (de_DE)
- 28 Greek (el)
- 29 Hebrew - עברית (he_IL)
- 30 Hindi - हिन्दी - (hi_IN)
- 31 Hungarian - Magyar (hu_HU)
- 32 Icelandic - íslenska (is_IS)
- 33 Indonesian - Bahasa Indonesia (id_ID)
- 34 Italian (it_IT)
- 35 Japanese (日本語 - ja)
- 36 Javanese
- 37 Kazakh - Қазақша (kk)
 - 37.1 Қазақша (kk_KZ, kk-Cyrl)
 - 37.2 قازاقشا (kk_CN, kk-Arab)
 - 37.3 Qazaqşa (kk_TR, kk-Latn)
- 38 Khmer (Cambodian Language)- ខ្មែរ ភាសា (km_KH)
- 39 Korean - 한국어 - (ko_KR)
- 40 Kyrgyz - Кыргызча (ky)
- 41 Kurdish (Sorani) - کوردی سورانی
- 42 Kurdish (kurmanji) Kurdî
- 43 Latvian (Latviešu) (lv)
- 44 Lithuanian - Lietuviškai (lt_LT)
- 45 Macedonian - Македонски (mk_MK)
- 46 Malagasy (mg_MG)
- 47 Malay – Bahasa Melayu (ms_MY)

[3] We found the extension of 'Hindi' language in content list: **hi_IN**

[4] Now locate the language file in plugin directory.

Path: wordpress-directory\wp-content\plugins\appointment-calendar-premium\languages\

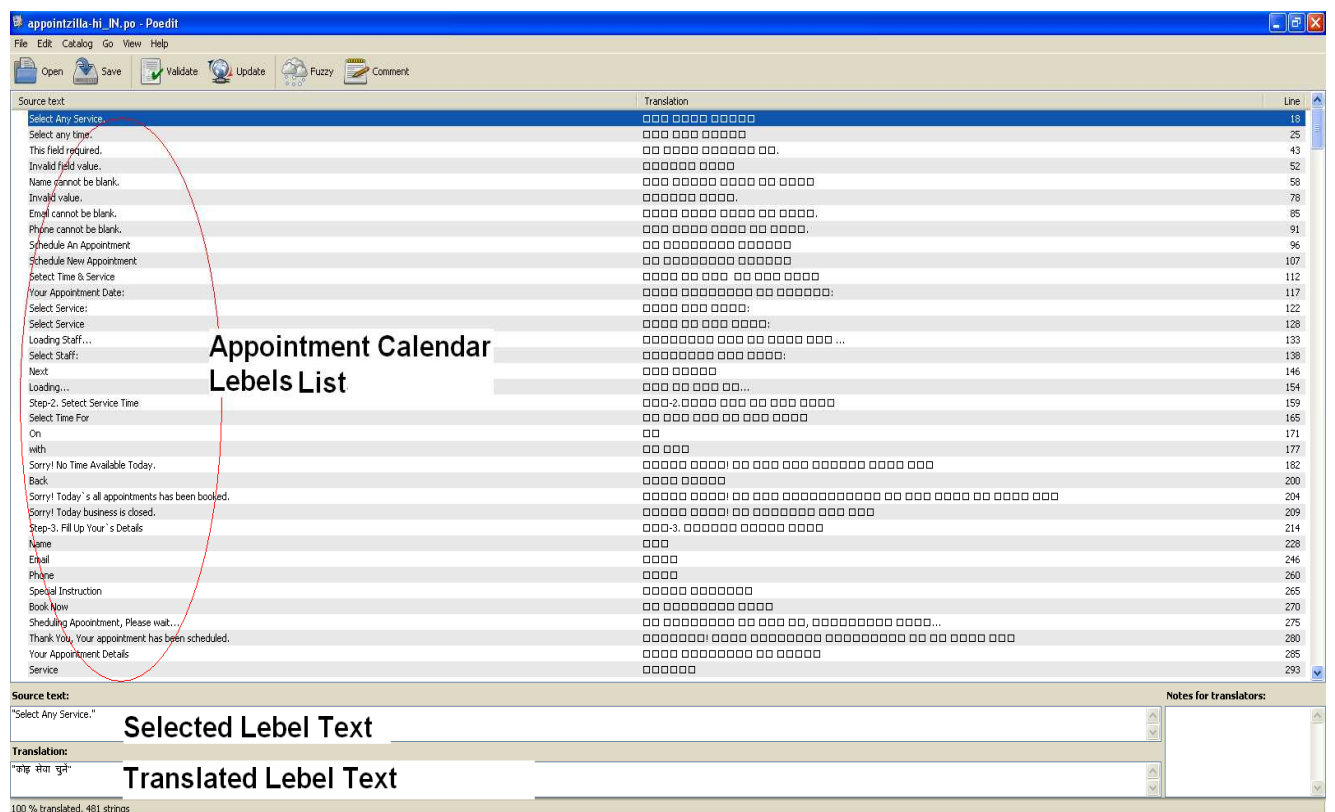

File: **appointzilla-your-language-extension.po**

[5] Rename file with assigning 'Hindi' language extension 'hi_HI' as:

appointzilla-your-language-extension.po to appointzilla-hi_IN.po

[6] Open '**appointzilla-hi_IN.po**' file in PoEdit

[7] Select **Source Text** from above list & replace with **Translation** text

[8] Save file in plugins/appointment-calendar-premium/languages/

[9] Open **wp-config.php** file (path: your-WordPress-directory/wp-config.php)

[10] Edit Line 72: **define('WPLANG', 'hi_IN');**

Thank You! You Done!
